0.69%

PERCENTAGE OF TOTAL STAFF POPULATION CONFIRMED POSITIVE CASES

0.54%

To ensure our parents, staff and community members are provided with the most recent and accurate information, the Baldwin County School District will publish weekly COVID-19 status reports each Friday. The BCSD COVID-19 Weekly Status Report will summarize the new positive cases each week within the student population attending school in-person as well as in the population of staff members working in-person at our schools or in the district office. In accordance with the Georgia Department of Public Health, the school district will work diligently to ensure that proper guidelines are followed to isolate the student/staff diagnosed with COVID-19, identify close contacts and disinfect areas of the school when notified of a positive COVID-19 case. We will continue to notify students and/or employees who have come in contact with someone who has tested positive for COVID-19 at their designated school or work location. Per privacy guidelines, no additional information will be shared regarding the individual(s) who has tested positive for COVID-19.
